CROSS-DATABASE JOINING

NEW FEATURES EXPLAINED

Cross-Database Joining

#01

Do you have data from different types of data sources that you want to bring together in one document? In Tableau 10 it is GOODBYE data blending and HELLO easy cross-database joining.

No need to understand complex blending logic in order to join data from different types of data sources. Now just use standard joining dialogues to automatically create joins between almost any types of data. In Tableau 10, even your baby sister can do it!

NEW IN TABLEAU V.10

The Tableau logo is displayed in a dark blue, lowercase, sans-serif font. A red heart icon, composed of a grid of small squares, is positioned below the 'a' and 'b' of the word. The entire logo is set against a light gray, hand-drawn style background that resembles a splash or a brushstroke.The Google logo is shown in its characteristic multi-colored font: blue 'G', red 'o', yellow 'o', blue 'g', green 'l', and red 'e'. It is centered below the Tableau logo and the heart icon.

GOOGLE SHEETS INTEGRATION

NEW FEATURES EXPLAINED

Google Sheets Integration

#02

If you ever wanted to put live Google Sheet data into a Tableau visualisation and immediately update your report, it was as easy as catching fish with a broomstick. Now with Tableau 10, Google Sheets can easily be connected to your reports, without any hacks or work-arounds.

With Tableau 10's Google Sheet data connector, it's now possible to dynamically see the effect of live data on your reports. This means that it's even possible to build applications and web input forms using Google Sheets that can allow users to input data from mobile devices, desktops, and remote locations, all directly to your dashboard. Who said that life needed to be complex!

DATA CLUSTERING

NEW FEATURES EXPLAINED

Data Clustering

#03

Ever wanted to know who your real friends are and who only love you for your intellect? Well now it's a one click operation to cluster your groups of friends or any other set of objects by using Tableau 10's new clustering algorithm!

Tableau 10 uses a simple interface to add various factors to your clustering analysis and get an output of the statistical model in a picture (visualisation) that is easy to see and understand. No more thinking or wondering needed! By using Tableau 10's clustering, look and see who really likes you for who you are.

Cross-Database Filtering

#04

What rain is to the Karoo, cross-database filtering is to the data analyst! In Tableau 10, the rain has finally come, with simple cross-database filtering automatically enabled across all your data sources.

Whether your data fields have the same names or not, setting up the ability to filter common fields across data sources is as easy as kicking dust in the desert. Use dynamically updated fields (unlike static parameters) to filter across your data sources in Tableau 10 – No complex calculations or conditions needed.

WORKBOOK FORMATTING

NEW FEATURES EXPLAINED

Workbook Formatting

#05

Let's not kid, Tableau is great for data analysis and visualisation but its output formats have not always been pretty.

In Tableau 10 however, we now have the ability to quickly apply custom formatting across the entire workbook. It's easy to use and quick to make reports and dashboards beautiful. Who needs to go bar-hopping to find beauty and fun, as Tableau 10 now provides this all in one package.

DEVICE-SPECIFIC DASHBOARDS

NEW FEATURES EXPLAINED

Device-Specific Dashboards

#06

Any report or dashboard that is developed in Tableau can now be configured to have custom views for different devices. You can now set a single report to have a unique browser version, tablet version and smartphone version. The Tableau server will recognise the device that is trying to access the report and then automatically serve up the correct version for that specific device.

One report to rule them all, and Tableau 10 manages the rest for you!

TABLEAU COMES TO ANDROID

NEW FEATURES EXPLAINED

Tableau Comes to Android

#07

At last, more than half the world (66%) breathes a sigh of relief as Tableau is now available as an Android smartphone application.

For the first time in history, all Android users can now have their interactive Tableau dashboards ready for any fight situation in the office corridor, around the watercooler, or in the boardroom. Go straight to the Android Google Play store and download the Tableau mobile app so that you have your all-important reports with you wherever you go.

WEB-AUTHORING DASHBOARDS

NEW FEATURES EXPLAINED

Web-Authoring Dashboards

#08

If all you ever want is to edit dashboards in Tableau Desktop, but you only have access to Tableau Server, you now have the ability to not only edit existing dashboards but also create dashboards from scratch using nothing but the web editor. The web editor can be accessed from any internet browser, from any device, anywhere on the planet!

Now you can connect to an available data source, construct your sheets and bring them all together in a dashboard on Tableau Server. Share the Dashboards with your friends or colleagues to impress them with your new found artistic talent and problem solving skills that Tableau dashboards provide.

WORKBOOK REVISION HISTORY

NEW FEATURES EXPLAINED

Workbook Revision History

#09

We all make mistakes. Some of us more than others. Don't you sometimes wish you could just turn back time to the moment before everything went horribly wrong? Well now you can! Tableau 10 automatically saves and maintains every iteration of your published content.

Tableau Server retains historical copies of your work so that you can recall a previous version of your workbook in just a few clicks. Breathe a sigh of relief as you realise that you will not need to work over the weekend to fix something that was already working yesterday.

MANUALLY SUBSCRIBE USERS

NEW FEATURES EXPLAINED

Manually Subscribe Users

#10

Want to inform (or even irritate) your colleagues with regular updates from your reports? Tableau 10 now provides the ability to create push subscriptions and push notifications.

As the author of workbook content, you can manually subscribe people to receive scheduled emails with your report. In the past, users had to subscribe themselves, but now it's also within the author's control. No more begging users to subscribe to your report – Just do it for them.
